SELECTED PROJECTS

Lantern Offering | Temple of Venus and Roma

Independent ritual-space research | Unreal Engine 5.7, Blueprints, Blender

https://github.com/Kuki-Hill/ue5demo-rome | Showcase video

- Built a guided first-person desktop tour of the temple exterior, using incense offering, libation and a final look back to explore how ritual shapes the experience of architecture.
- Implemented a Blueprint controller that checks distance and viewing direction before allowing interaction. Used UMG prompts, lighting and Niagara smoke to guide visitors and confirm their actions.
- Used museum references to model ritual props and a full-scale oil-lamp study in Blender. Produced a 27-second Sequencer showcase.

Roma Reconstructa | Interactive Heritage Exhibit

Processing / Java, Blender, Figma

https://github.com/Kuki-Hill/Processingdemo-Rome

- Built a 3D desktop exhibit with orbit, pan and zoom controls, four clickable interpretation points and five viewing modes for the Temple of Venus and Roma.
- Contributed Blender modeling, Figma interface design and content planning to the earlier Rome Heritage exhibition at the BUCEA Digital, Virtual & Computational Design Workshop.

Windborne | Head-Controlled 3D Game

PolyU Programming coursework | TypeScript, Three.js, MediaPipe

https://github.com/Kuki-Hill/WingBrone | Play demo

- Built and published a browser game that maps calibrated webcam head movements to four dodge directions, with guided practice, real-time feedback and keyboard fallback.
- Reworked attack cues after a classmate’s playtest and added automated checks for gesture thresholds, timing and tracking recovery.

EDUCATION

Nanjing University Expected Jun 2028

Master’s in Architecture, Architecture and Urban Design

The Hong Kong Polytechnic University Expected Jun 2027

MSc in Innovative Multimedia Entertainment (dual-degree programme)

Beijing University of Civil Engineering and Architecture Jun 2025

Bachelor of Architecture, Urban Design concentration | GPA 3.87 | Ranked 2nd of 49

SKILLS

Tools Unreal Engine 5 (Blueprints, UMG, Niagara, Sequencer), Blender, Figma, Processing, TypeScript, Three.js, MediaPipe

Languages English (IELTS 7.0), Japanese (JLPT N1)
